MOHITH L A

+91 8792024946 | mohithla24@gmail.com | LinkedIn | Portfolio | GitHub

OBJECTIVE

Computer Science Engineering student with hands-on experience in full-stack development and software engineering. Strong foundation in C, C++, Java, data structures, OOP, DBMS, operating systems, and computer networks, with experience building real-world projects and working with modern development frameworks. Seeking an opportunity to apply my technical and problem-solving skills, contribute to impactful software solutions, and grow as a software professional.

EDUCATION

NMAM Institute of Technology, Nitte **2023 – 2027**
Bachelor of Technology (B.Tech) in Computer Science and Engineering **CGPA: 8.17**
Sri Vidhyabharathi PU College, Shivamogga **2021 – 2023**
Pre-University (PCMB) **Percentage: 89.5%**

PROJECTS

Smart Campus Agent System — AI-Driven Campus Operations Platform
Tech Stack: Python, FastAPI, LangGraph, Google OR-Tools (CP-SAT), Next.js

- Built an AI timetable engine using Google OR-Tools CP-SAT (12+ hard constraints, weighted soft objectives) with a natural-language assistant that turns single-sentence requests into validated, multi-step timetable updates.
- Designed a human-in-the-loop leave & substitution workflow in LangGraph, where a multi-agent supervisor builds clash-free period-exchange plans and pauses for HOD approval before notifying affected teachers.

AI Surveillance Dashboard — Object Detection System
Tech Stack: React.js, Python, Tailwind CSS

- Developed a real-time AI surveillance dashboard for live object detection and monitoring using YOLOv8 and OpenCV with optimized video streaming.
- Implemented a WebSocket-based real-time analytics dashboard for low-latency monitoring and live object detection.

Police Theft Management System
Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a MERN-based police theft management platform with JWT authentication, role-based access, and incident reporting.
- Engineered an automated suspect matching engine using geospatial proximity, crime categories, and physical attributes, and integrated QR code-based property verification for faster asset recovery.

WORK EXPERIENCE

Full Stack Development Intern — Thaniya Technologies **Jun–Jul 2026**

- Completed a 2-month full-stack development internship, building and shipping features using modern web development practices.
- Collaborated on production-style development workflows, applying REST API design, database integration, and responsive UI implementation — reinforcing skills directly applicable to enterprise software development.

TECHNICAL SKILLS

- **Languages:** Java, Python, C, C++, JavaScript, TypeScript
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Spring Boot, REST APIs, Hibernate, Spring Data JPA
- **Databases:** MySQL, MongoDB, Oracle, PostgreSQL
- **AI/ML:** YOLOv8, OpenCV, LangGraph, Google OR-Tools, Machine Learning
- **Tools:** Git, GitHub, Maven, Postman, VS Code, STS
- **Concepts:** DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) 2025 Certified AI Foundations Associate — Aug 2025
C++ programming (Beginner - Beyond) — Udemy — Jun 2024
Complete PYTHON pro Bootcamp — Udemy — Jun 2024
Data Analytics Job Simulation — Deloitte Forage — Jun 2025

EXTRACURRICULAR ACTIVITIES

- **Core Member** – Finite Loop Club (FLC), contributing to coding events, technical workshops, and problem-solving activities.
- Interests: Video Editing, Cricket, Gaming, and exploring emerging technologies.
